

ESUG to Produce Conference DVD

Due to the success and demand of last year's ESUG International Smalltalk Conference DVD, plans are underway to produce another DVD for the 2007 conference.

Producers of the DVD will start with the DVD06 and update everything. If you missed something on last year's DVD, please tell us!

Vendors or Open Source projects can provide a complete directory (with html and installer), if they want. (We actually would prefer that, since you can do a much better job in presenting than we can.)

The directory structure for now includes:

- AmbraiSmalltalk
- Books-Tutorial-Lectures
- Dolphin
- FScript
- GemStone
- GNUSmalltalk
- Historical
- Moose
- Seaside
- Self
- SharpSmalltalk
- SmalltalkMT
- SmalltalkX
- Squeak
 - BotsInc
 - Croquet
 - Historical
 - squeak3.9
 - SqueakDev
 - Squeakland
- Strongtalk
- VASmalltalk
- VisualWorks7.5nc

Any help would be very much appreciated! Please submit your suggestions or contributions by Monday, August 6, 2007.
